J
Tom Bishop called to advise me that an envelope bearing the return address of the New York Times, 1920 L Street, N. W., Washington, D. C., was delivered to his office by courier. He advised me he did not know the identity of the courier; however, the courier was given this envelope by a guard at the entrance of the building. These are the only facts known with reference to this matter. u

McP
LC# 33896
A quick examination of the material indicates that it is additional material apparently delivered to the New York Times which appears to be identical to that heretofore furnished to Congressman Mitchell of Maryland and Senator McGovern of South Dakota. u

ACTION RECOMMENDED:

Under the circumstances it would be helpful if a contact could be made with the New York Times to determine the manner in which this information was delivered to the New York Times office here in Washington. It will also be desirable to attempt to trace back its delivery to Bishop's office. If approved, a contact will be made with the New York Times and in the meantime we will attempt to interview the guard at the entrance of the Justice Building who allegedly had this package handed to him. The attachments are being forwarded to the Laboratory for appropriate examination. u

MICHAEL KENNEY

The stolen FBI files... what they mean

From the mail and through contacts in the movement, I have in my possession 55 pieces of paper which are copies of 26 of the reports and directives stolen from the FBI office at Media, Pa., on the night of March 8.

They have been a constant presence, if only because of the inquiries, official and unofficial, as to how and why they came into my hands. Oddly, nobody has asked what they mean, in themselves and in their theft.

Everything known about the circumstances of the raid, even the textual evidence in the communications from the raiders, indicates a relationship, political and tactical, with the series of actions against draft boards by such groups as the Catoisville Nine, the Milwaukee 14, the Boston 8 and the East Coast Conspiracy.

The draft board actions had at least two purposes: to physically impede the process of induction and to pose the moral

Michael Kenney is a Globe staff reporter.

question of the relative value of paper files and lives of GIs.

The FBI can't be disrupted by one raid. It orders new locks, transfers the Media staff around and keeps right on its business. Nor is it likely that the FBI's top secrets were entrusted to Media.

But in its first announcement of the raid, the Citizens Commission to Investigate the FBI said that one of its main purposes had been "to determine the nature and extent of surveillance and intimidation carried on by this office of the FBI, particularly against groups and individuals working for a more just, humane and peaceful society."

All of the documents distributed by the raiders bear on this question.

From the reports, one can derive a fair idea of the FBI's telephone monitoring practices, its ready access to bank account records and its earnest use of informants.

There were also memos directing agents to make sure their informants attended Black Student Union and War Resisters League conventions, and another giving instructions on how to investigate

students and scientists who have spent a month in Russia.

But beyond these indications of how the FBI has operated, the Citizens Commission has apparently gotten the names of presently-active sources, contacts and informants in the Media area.

The raiders are now visiting these people, threatening them with exposure, if they do not cease such activities.

The raiders have produced the documents that prove how deeply the FBI is involved in surveillance of black and anti-war groups. That comes as no surprise, but it is good to have evidence of how they do it and what kinds of information they are squirreling away.

More importantly, the courageous actions of the Mar. 8 raiders — like the equally risky actions of former Military Intelligence agents in Boston and elsewhere who have blown the whistle on those operations — demonstrate that people with a passion for freedom will somehow find a way to expose repression.

The Media office, and the FBI itself, is a little less of a fortress now.

The following summarizes current investigation into the March 8, 1971, burglary of the Media, Pennsylvania, Resident Agency. A group calling itself the Citizens Commission to Investigate the FBI has claimed responsibility for this burglary which resulted in the theft of FBI documents. u

XEROX EXAMINATION: Through the cooperation of Xerox Corporation, Webster, New York, and local representatives in the Philadelphia area, efforts are continuing in an attempt to identify the Xerox copier utilized by this group in the reproduction of stolen documents and their circularization to the news media and certain Congressmen. The equipment has been identified by Xerox as a Model 660 of which approximately 100,000 are in existence nation-wide. One thousand of these machines are in the Philadelphia area and intensive investigation is being conducted to pinpoint if any of these 1,000 were utilized. We are also concentrating investigation in Princeton, New Jersey, area where several packets of stolen documents were mailed. Only 30 Xerox machines of this model are existent there and copies are being obtained from each for immediate comparison by the Laboratory and Xerox Corporation. u

CLAIMS BY "RESIST": Our Boston Office advises that an article appeared in the March 26, 1971, issue of The Harvard Crimson captioned "Stolen Reports Reveal FBI Undercover Activities" which recounts information already reported by the news media. It was claimed, however, that twelve FBI documents were anonymously mailed on March 18, 1971, to "Resist" a national peace organization in Cambridge, Massachusetts. These were subsequently furnished the New York Times, Washington Post, Los Angeles Times, The Harvard Crimson, Senator George McGovern, u

and Representative Parren Mitchell by "Resist."

An immediate attempt was made by Boston Agents to interview individuals at "Resist"; however, the three males and the female on the premises refused to identify themselves or furnish any information whatsoever. The above has been furnished the Internal Security Division of the Department and this phase is being pressed. u

THREAT BY CITIZENS COMMISSION TO CONTACT INFORMANTS: Various sources have indicated Citizens Commission intends contacting sources and informants identified through disclosures in stolen FBI material. On March 29, 1971, the Washington Bureau of the Los Angeles Times turned over a letter to WFO which it had received in the mailepostmarked Philadelphia, Pennsylvania, from the Citizens Commission in which the group calls for immediate withdrawal from Vietnam and indicates contacts will be made with FBI undercover Agents suggesting they cease "their repressive actions" and indicating the names will be released to the press. A list of possible targets among sources and informants has been compiled and Philadelphia instructed to make arrangements to afford these individuals appropriate coverage in the event they are contacted. All informants and sources have been realerted as to these possible contacts. u

MEDIA, PENNSYLVANIA, MARCH 8, 1971
THEFT OF GOVERNMENT PROPERTY

OMEDBURG

Information has been received from our Washington Field Office to the effect that on March 25, 1971, a notice was filed with the National Capital Park Service for a proposed demonstration on Good Friday, April 9, 1971, by the Tribe of Ezekiel. This demonstration is in connection with the East Coast Conspiracy to Save Lives. A summary of an FBI teletype dated March 31, 1971, setting forth details of this matter was furnished your office on March 31, 1971. There is attached hereto for your ready reference a copy of the March 31, 1971, teletype. u

It is noted that as many as 400 persons are expected to participate in the demonstration which will start at Lafayette Park. It has been learned members of the group discussed an attempt to enter the Justice Building and distribute copies of documents which had been stolen from the Media, Pennsylvania, Resident Agency of the FBI. If they are unable to enter the Justice Building, they plan to distribute such documents outside of the building. u

Re Philadelphia airtel, 4/9/71.

As a follow-up to referenced airtel there are enclosed herewith a copy of an FD 302 from agent who discovered Media burglary, 3/9/71, and a copy of his diagram of the physical set-up of the Media RA at the time of the burglary. U

In order to describe burglary, refer to enclosed diagram of office space at Media RA. U

A. Main entrance to Media RA which contains two locks on door. The top lock was not visibly effected. The bottom lock on door at entrance A had apparently been forced in a circular rotation by a tool gripping outer edge so that lock was damaged and rim around lock contained teeth marks from tool used in unsuccessful attempt to open. U

B. Burglars apparently gained entrance through door by picking bottom lock (substantiated by FBI Lab examination) and top lock forced upon and frame containing lock shattered from inside door. Supply cabinets moved from door so that a thin person could gain entrance. Supply cabinets previously placed against door as door was not used. U

Stolen Documents: FBI vs. Catholics

By Vin McLellan

Federal agents are focusing their hunt for the people who stole revealing and embarrassing documents from a Pennsylvania FBI office on the radical Roman Catholic community here in Boston, in New York, Philadelphia, Baltimore and Washington, D.C.

The FBI investigation, surely one of the Bureau's most extensive man-hunts ever, has been strangely unreported or even mentioned in the national media. A *Phoenix* probe into the nature and extent of the FBI investigation over the past several weeks has revealed a considerable amount of information on just what the Bureau has been up to.

The Citizen's Commission to Investigate the FBI apparently made a dangerous mistake when they decided to use a Xerox machine to make copies of the documents they stole. After the FBI got hold of one of the packets mailed by the group — last week they rubbed salt in the wound by mailing two more batches — they brought it to the Xerox research laboratories in Rochester, N.Y. There, Xerox experts established that the papers had been copied on one of Xerox's low volume, table-top model machines, on the Xerox 660 model line (660-I, 660-II, 660-III).

The *Phoenix* also learned that contrary to popular belief — and even the opinion of some Xerox salesmen we consulted — each Xerox machine leaves a "fingerprint" on each copy it produces. It is possible then to identify the machine from which the copies were made by a laboratory comparison between a sample from the copier and the copies of the documents disseminated. We have also confirmed that the FBI last week was visiting companies and individuals in Boston who rent 660-model copiers from Xerox to get samples from the machines.

The FBI task on the surface is enormous, there are several hundred thousand such copiers across the nation, and it is estimated that there are more than 2,000 in the Greater Boston area alone. But their task has been lightened by assistance from Xerox. Xerox put out a corporate memorandum throughout its offices across the nation a couple of weeks ago. Although we have been unable to ascertain the contents of the memo, the nature of at least one of the requests may be assumed.

Each Xerox machine has a built-in meter which counts the number of copies made on the unit. These counts are noted monthly by the Xerox salesmen and collated and computed at regional Xerox offices. Since

the 660 model copier is basically a low-volume machine, and the number of stolen FBI documents which were copied and mailed out was considerable, the FBI is checking those machines which showed an abnormally high count for the month of March. The data on which 660 machines are "high count" is being supplied by Xerox.

The Xerox machine "fingerprint" is left on a Xerox copy because the images of scratches, imperfections and chips in the light sensitive selenium "drum" — the key element in the Xerography mechanism — are reproduced on each copy produced by the machine along with the image of whatever is being copied.

The FBI has apparently decided that the whole situation fits the pattern of the non-violent militant Catholic radicals.

Since two days after the theft, on March 8th, the FBI has been maintaining a constant and intense surveillance on the Radical Catholic community along the East Coast. Much of this community is now wrapped up in support work for the Harrisburg Conspiracy trial. Indeed, nearly all the defendants and co-defendants in that case have been questioned, followed, and harassed with regard to the Media theft.

Here in Boston, Federal agents have contacted or are attempting to contact virtually everyone associated with the activist radical Catholic community. FBI agents are visiting friends, co-workers, employers and the family of these people also. Agents are also attempting to maintain fairly constant contact with some of this area's Catholic activists, calling at their residence every couple of days. In most cases, the subjects refused to talk with the agents, but in others, the one-sided discussion focused upon the Media theft.

In New York, Federal agents visited the Jesuit Theologate at Woodstock, also in N.Y. City at least ten times last week. Once they came three times in one day, asking about the activist activities of some of the community's priests. Agents have been following some N.Y. Catholic activists 24 hours a day. Elderly parents and relatives of these suspects have also been continually questioned.

In Washington, staffers at the D.C. Harrisburg Defense Committee headquarters, said the Federal agents had been very active contacting people involved with their community. Paul Couming, a Boston draft resistor whose recent church Sanctuary and court trial drew considerable attention, and who is now working in Washington, said: "They have attempted to visit or have visited just about everyone involved in our community... they've apparently centered on our group."

(Mount Clipping in Space Below)

Reports from Baltimore and Philadelphia have described the activities of the federal authorities along the same pattern. Rev. Jack White, a priest assigned to Warwick House, the rectory of the churchless St. Philip's parish in Roxbury, was one of the few Boston Catholic activists who let the agents get further than opening salutations when they visited him. "I try and treat everyone who comes here civilly," explained Father White, "so I gave them coffee and sat down with them... but they tried to play this heavy and nice-guy routine with me and kept drumming on the Media theft after I had told them I certainly didn't know anything about it... so I had to somewhat rudely end the interview."

Up and down the east-coast, the same pattern seems to be emerging. Everyone connected with the radical Catholic activist movement — but especially those who have been involved or alleged to have been involved in the Berriganesque tactic of raiding draft boards — have been contacted. Again, parents, friends and co-workers have been questioned about the subjects' activities and movements in the first two weeks of March.

In this investigation, as in everything that tangles the radical Catholics with the FBI — or with local police, for that matter — there have been a number of situations that leave a taste of poignant irony.

One of the agents who visited Boston Catholics, getting into a friendly conversation with a Catholic anti-war militant, after it became clear that he wasn't going to get the information he had come for, mentioned as how he was rather pleased he had not been involved in working on the Berrigan/Harrisburg Conspiracy Case. He had fond memories of the days when Dan Berrigan had been one of his college teachers and he would not have enjoyed helping develop the case against the priest.

One of the New York priests involved in the N.Y. Harrisburg Defense Committee found himself serving communion to an old school chum — who also happened to be the FBI special agent who had been assigned to keep him under constant surveillance. For the Catholic activists this is not an uncommon sort of situation. As Shawn Donavan, a staff member at the headquarters of RESIST in Cambridge and a member of activist Catholic circles, noted: "A while ago, NBC did a show in which they called my old school, Holy Cross, the birthplace of the Catholic Left... we produced at least as many FBI agents as Catholic radicals... It's funny," he said quietly, "how people's lives take different turns..."

GENERAL INVESTIGATIVE DIVISION

Attached relates to an article published in "The Phoenix", a Boston weekly newspaper dealing with politics, the arts, and the anti-establishment scene in the Boston area. It was written by "The Phoenix" city editor, Vincent McLellan, and relates to the FBI's investigative efforts to identify the Xerox Model 660 machine used to copy the stolen documents. Buffalo advised McLellan had telephonically contacted Xerox headquarters in Rochester, New York, on 4/12/71 identifying himself as a part-time reporter for "The Washington Post". Xerox officials, Rochester, furnished McLellan with information regarding FBI's investigation.

There follows a summary of current developments in the investigation of the Media Resident Agency burglary during the night of March 8, 1971, during which a quantity of FBI documents were stolen.

RUTGERS UNIVERSITY PRESIDENT CONTACTED BY CITIZENS COMMISSION:

During the past several days, as previously reported, sources and informants have been receiving communications from the Citizens Commission warning them to cease cooperation with the FBI and threatening to publically announce their identity. Newark advises that Richard Schlater acting President of Rutgers University received a mailed communication 4/6/71 advising him of the identify of a so-called informant and enclosing copy of an FBI interview report form in a racial matter investigation which show one of our sources as [redacted]

[redacted] On the copies furnished President Schlater, [redacted] name was underlined in red.

Schlater who has publically admitted being a Communist Party member from 1935 to 1937 at Oxford University, England, and from 1937 to 1939 at Harvard University did not call the FBI but notified his assistant who is in charge of the campus police who in turn notified our Newark Office. The documents were obtained and are being forwarded to the FBI Laboratory for examination. The envelope transmitting them was disposed of at the post office by Schlater and subsequent investigation indicates it had been burned prior to our inquiry.

OTHER "HITS" ON FBI PLANNED: Philadelphia reports that information received from [redacted]

SUSPECT [redacted] One of the primary suspects developed thus far is [redacted] who is active in the [redacted]

The Laboratory advises that based on a comparison of handprinting on the envelopes containing copies of stolen FBI documents which were received by Senator McGovern and the Washington Bureau of the Los Angeles Times with that of [redacted] it is unable to eliminate [redacted] as a suspect because of certain similar characteristics. * Additional handprinting samples are being sought for further comparison. CONTACT WITH PHILADELPHIA "BULLETIN": On April 5, 1971, [redacted] called our Philadelphia Office advising he had received a brown envelope containing a packet of copies of FBI documents postmarked New York, date unreadable. He declined to furnish material to the FBI. [redacted]

[redacted] in subsequent contact advised he was unable to obtain originals but would furnish Xerox copies. [redacted] indicated [redacted] was reluctant to furnish original evidence for fear of involving innocent persons through fingerprints innocently placed on documents. Copies of these documents were obtained and are identical to those which had been furnished the Chicago Bureau of the Los Angeles Times and have been forwarded the Laboratory for examination. The Internal Security Division has been advised. U

ON APRIL TWELVE INSTANT, QTWENTYTHREE, QTWENTYFOUR, AND
QTWENTYEIGHT WERE EXHIBITED TO [REDACTED]

AND [REDACTED]

[REDACTED] HAMMERMILL PAPER COMPANY (HPC), ERIE, PA.,

AT WHICH TIME THEY ADVISED THEY WERE UNABLE TO MAKE ANY
POSITIVE IDENTIFICATION OF THE EXACT TYPE OF PAPER OF SAMPLES;
DUE TO CONDITION OF SAME AS RESULT OF TREATMENT BY FBI LAB. U

b6
b7c

[REDACTED] ATTEMPTED TO MEASURE SMOOTHNESS OF SAMPLES
COMPARING SAME WITH SPECIFICATIONS OF PAPER, BUT WAS UNABLE
TO DO SO DUE TO PRINTING THEREON AND RESULTS OF FBI LAB
TREATMENT. U

ST-115
REC-68

52-94527-762

13 APR 21 1971

HE NOTED THAT THE SAMPLES DID HAVE A CERTAIN AMOUNT OF
SMOOTHNESS ON CORNERS WHICH INDICATED PAPER DID HAVE AN
ORIGINAL SMOOTHNESS FACTOR OR A DUPLICATOR FINISH. THIS

SMOOTHNESS WOULD ELIMINATE A XEROX ONE FIVE TWO FOUR TYPE PAPER. HE NOTED THAT HANDLING AND TREATMENT OF COPY PAPER CAN DESTROY SMOOTHNESS, BUT CANNOT IMPROVE IT. HE STATED THAT SAVINGS-O-COPY PAPER HAS SMOOTHNESS BUT IS NOT AS SMOOTH AS SAMPLES, WHICH ELIMINATES SAMPLES FROM THIS TYPE OF COPY PAPER. U ACCORDING TO SMOOTHNESS OF SAMPLES, PAPER APPEARED TO BE MOST LIKE XEROX FOUR ZERO TWO FOUR OR HPC FORE-O-COPY PAPER.

COLOR OF PAPER COMPARED BUT DUE TO CONDITION OF SAMPLES, [REDACTED] STATED HE BELIEVES PAPER TO BE XEROX FOUR ZERO TWO FOUR RATHER THAN THE FORE-O-COPY PAPER. HE INDICATED ALL PAPER YELLOWS SLIGHTLY WHILE GOING THROUGH A DUPLICATOR PROCESS. U

SAMPLES WERE SUBJECTED TO A MACHINE TEST TO DETERMINE THE WHITENER VALUE (WV) IN THE PAPER. [REDACTED] ADVISED THAT XEROX PAPER HAS A WV BETWEEN ZERO AND TWELVE WHILE HPC PAPERS HAVE A WV BETWEEN TWENTY AND THIRTY. QTWENTYTHREE TESTED FIVE WV, QTWENTYFOUR NINE WV, AND QTWENTYEIGHT TEN WV. U

WV AS LOW AS TESTED IN THE SAMPLES AND ACCORDINGLY, BELIEVED THAT THIS PAPER WAS A XEROX PAPER EITHER FOUR ZERO TWO FOUR OR ONE FIVE TWO FOUR. AS NOTED ABOVE, XEROX ONE FIVE TWO FOUR PAPER ELIMINATED DUE TO THE SMOOTHNESS FACTOR IN SAMPLES. U

[REDACTED] ALSO STATED THAT IT WAS HIS PROFESSIONAL OPINION AND NOT BASED ON ANY DEFINITE FACTS OR TESTS, BUT RATHER BY COMPARISON AND ELIMINATION FACTORS, WITH THIS OPINION BASED ON FINISH, WV, AND COLOR, THAT THE QUESTIONED SAMPLES WOULD PROBABLY BE XEROX FOUR ZERO TWO FOUR TYPE OF PAPER RATHER THAN ANY OF THE OTHERS AND WHICH PAPER IS MANUFACTURED BY HPC SOLELY FOR XEROX CORPORATION'S USE AND DISTRIBUTION. U

b6

[REDACTED] ADVISED THAT HE BELIEVES XEROX CORP. MAINTAINS RECORDS OF WHO HAS CERTAIN DUPLICATORS AND THE TYPE OF PAPER USED FOR SAME AND THE AMOUNT USED FOR SALE PURPOSES TO INSURE THAT COMPANIES DO NOT USE ANOTHER TYPE OF PAPER. HE ALSO ADVISED THAT IF ANY ADDITIONAL SAMPLES WERE OBTAINED AND MADE AVAILABLE TO HPC BEFORE TREATMENT BY FBI LAB, HPC COULD

Re Bureau airtel to Minneapolis dated 4/3/71. *u*

Enclosed for the Bureau is item Q13. *u*

The following investigation was conducted at St. Paul, Minnesota, on April 31, 1971: *u*

[REDACTED]
Minnesota Mining and Manufacturing Company (3MCo), advised after examining item Q13 that it is a reproduction made on a manually operated 3M copier. He explained that by looking at the upper right-hand corner of the document a lighter shade will be noticed and this indicates that a manual machine was used. He noted that the dark dots appearing on the document could have been caused by dust particles on the exposure glass of the copier, by dust particles on the original document, or by flaws in the exposure glass. He indicated that it is unlikely there would be so many flaws in the exposure glass. *u*

He stated there is no way known to him to determine which model machine was used nor does he believe that samples obtained from other machines could be used to compare with Q13. *u*

SI-115 [REC-4 52-94527-767]

[REDACTED]
3MCo, agreed that Q13 was made on a manually operated machine; however, he noted that the paper used is designed for use on an automatic machine and is known as paper stock number 658. Paper stock number 607 should be used on the manual machine; however, they are interchangeable. *u*

He further pointed out that 3MCo receives the raw paper from several different sources, and it is coated for use as duplicating paper at three different plants. No attempt is made to insure that the raw paper is sent to any particular plant; therefore, there is no way of determining which plant may have coated Q13. *u*

APR 19 1971

SEVEN

MP 52-3157

Due to the large volume of production, there is no way of determining where Q13 may have been produced or what area to which it may have been distributed. U

Both men agreed that there is no test or examination available to them or any that they know of which could be used to compare Q13 with other known specimens. They added that they have no way of determining the model machine used to make Q13. U

The following is an explanation of the serials missing from PHfile 25-42351 entitled , SSA":u

On the original stolen list, 3/13/71, Philadelphia advised the Bureau that serials 3 through 13 were missing and presumed stolen. Xerox copies of serials 6, 11, and 12 were furnished at that time. Copies of the other serials were not available at that time at Philadelphia. Since then copies of serials 4, 9, and 13 were furnished to the Bureau. Copies of serials 3 and 10 were furnished to the Bureau 4/14/71 by airtel. u

A review of the file shows that a reserialization was made starting with serial 9. Serial 9 originally was Indianapolis letter to Philadelphia dated 2/16/71. This serial was reserialized in the file as serial 12 and is so-listed on the stolen serials list. Serial 9 presently is an SAC letter to Brig. Gen. GROSS of the Selective Service System dated 12/30/70. Serial 10, as mentioned above, was forwarded 4/14/71 to the Bureau. This is a USA letter dated 2/18/70 rather than 12/18/70 as originally reported on the stolen serials list. Bureau is requested to correct the date on its list. u

IN ORDER TO INSURE MAXIMUM PRODUCTIVITY OF SURVEILLANCES CONDUCTED IN THIS AND RELATED CASES, UPON OBTAINING CURRENT PHOTOGRAPHS ALONG WITH PERTINENT DESCRIPTIVE DATA OF PRIMARY SUSPECTS, SUCH SHOULD BE FURNISHED ALL MEDBURG OFFICES TO ASSIST IN THEIR INVESTIGATIVE ACTIVITIES. THIS SHOULD BE GIVEN HIGHEST PRIORITY. PLEASE ADVISE OF RESULTS OBTAINED TO DATE. *U*

NOTE: Extensive surveillance activity is taking place both in MEDBURG, EASTCON, and related security investigations. From reports received from the field, it would appear many of the primary suspects are unfamiliar to surveilling Agents. In order that our surveillances may be effective and productive, it is imperative our personnel be familiar with those who may be primarily responsible for this offense. *U*
